

DISK STRANDER

SDG**BEST IN CLASS FOR:**

WOOD BASED PANELS:

PB/SPB

OSB/LSB/FOSB

TECHNICAL FEATURES

- The DISK STRANDER is a machine for STRAND and high quality flakes production
- Knives and Counter knives with various angles
- Inserts modularity that allow to obtain widely configurable lengths and widths product
- Automated and assisted hydraulic cutting process
- Adaptability for the OSB panels production and / or low density PB.

BENEFITS

- Automatic advance control
- Cutting disc long operating life
- Hydraulic start
- High dimensional strand control accuracy
- Constant cutting with different logs sizes
- Disposable knife or grinding knife version.

M1 = VIBRATING MOTOR
