

PALLET PRESS

The single-opening press for pallets production is able to produce all kinds of pallet from all varieties of wood-based raw materials.

MAIN FEATURES

- Press capacity varies from 50 to 60 pallets/hour depending on the pallet format produced
- All pallet are inspected one at a time for weight, dimensions and density
- An automatic feedback goes back to the press to ensure quality and compliancy with international standards
- A special control software system carries out an accurate real time analysis of production.
