The CGDW is a device which has been designed to control wood particle mixing time in blenders. The CGDW reads and processes signals (analogue and digital) to regulate the power absorbed by the blender shaft motor in relation to the amount of wood being resinised.

**MAIN FEATURES**
- Automatic control of the blender discharge gate
- Optimal blender operation
- Maximized machine load
- Constant retention time
- Keyboard parameter programming
- Digital PID adjustment
- Alarms to signal malfunctions.

**ADVANTAGES**
- Optimised blending process
- Reduced resin consumption
- Greater particle friction
- Better board quality properties
- Continual control of the current absorbed by the blender.

**OPTIONS**
- ATEX: Equipment compliant with 94/9/CE/ATEX 95 Directive and suitable for zone 22 installation (on the basis of Directive 99/92/CE ATEX 137), and that is, intended for use in potentially explosive atmospheres due to the presence of dust.
COMPRESSED AIR CONSUMPTION ~ 1Nm³/h
6 bar (max 7 bar)
