DISK STRANDER

SDG

TECHNICAL FEATURES

- The DISK STRANDER is a machine for STRAND and high quality flakes production.
- Knives and Counter-knives with various angles.
- Inserts modularity that allow to obtain widely configurable lengths and widths product.
- Automated and assisted hydraulic cutting process.
- Adaptability for the OSB panels production and / or low density PB.

BENEFITS

- Automatic advance control.
- Cutting disc long operating life.
- Hydraulic start.
- High dimensional strand control accuracy.
- Constant cutting with different logs sizes.
- Disposable knife or grinding knife version.
