## FEEDERS

### VIBRATING CHANNELS – VFG

#### TECHNICAL FEATURES

• An adequate wood material feeding system is the main goal for reaching the optimal production capacity of all wood cutting machines • Globus vibrating feeder, are able to feed wood material at high speed, thanks to a special acceleration system called “leaf spring” • Extra high acceleration leave a perfect material alignment and the extra shake allow a perfect separation of stone and dust, collected by a special screen at the feeder end • The sturdiness of the driving mechanic group, together with the “leaf-spring” system made in compound material, reduces maintenance costs at the minimum.

#### BENEFITS

• Excellent feeding and fluidification of any type of raw wood • Minimized energy consumption • Low maintenance cost.

MODEL	OVERALL DIMENSIONS mm***
